OBJECTIVE

Hi, my name is Trung. I'm a front end developer with four years of experience and i'm living in Ho Chi Minh city, Vietnam.

I'm interesting websites that amazed my users as well as delivering them in high quality.

After four years working with UI/UX, Canvas and Framework Vuejs, I always have goal high performance, understand what is a customer looking for, and give appropriate advice because that grow up me.

My goal is to improve my skill to make high quality websites and now I'm working with my dream and make it bigger.

GUMI VIETNAM .,JSC

Front-end developer at Gumi Vietnam

• Math Content

- One of the big project that I've ever worked on, It is project for education games, I have a chance to participate in project and working with Japanese Ministry of Education.
- Web interactive applications using Canvas (CreateJS).
- Some outstanding games such as make the Flashcards for kids to learn addition, subtraction, multiplication and division, the Watches that can adjust the hour, minute and second hands, the Multiplication Table, etc.

• Lawyer

- This is a project used for hiring lawyers, and one of the major systems in Japan.
- Multiple-tasks, propose ideas, time management, Sockets are skills that I learned during this time period.
- Some outstanding games such as real-time web chat requirements made in VueJS and Pusher was a technical and UI challenge for me. Besides, the system also has the feature of managing files also using VueJS combine with Laravel, management system is same Google Drive.

• Artizon Museum

- Bridgestone Museum of Art is an art museum in Japan.
- Built mobile prototype for project using AppcannJS.
- Use beacons that is a small electronic device that emits

Bluetooth Low Energy (BLE) bluetooth signal.

- Some features such as your location is based on beacons, filter the pictures detected by beacon.

- **Pharmacy**

- Pharmacy is a system used to book doctor appointments.
- Has some features such as scanning bar code, register as a member and schedule a date and time for medical examination, etc...

- **SDGs Matching**

- At project heart are the 17 Sustainable Development Goals (SDGs), which are an urgent call for action by all countries - developed and developing - in a global partnership.
- Use the entire VueJS with the feature of posting articles, decentralizing the above targets.
- Some outstanding features such as dynamic forms, identity verification by a third-party, decentralization between personal and organizations, handle chart.

- **Kaikei**

- A product of Gumi Vietnam, This is the management system for the entire project of the company, in addition to the company's revenue statistics, the management of the company's salaries and employees.
- Use the entire VueJS combine with Vite, Pinia, Ant design, i18n, Vee-validate, etc.
- Some outstanding features such as dynamic forms, multiple language, identity verification account, decentralization between personal and organizations, handle chart, etc.
